- 1080 mm
- 685 mm
- 650 mm

\*monthly water saving based on common average family use of washing machine, compared to pre-2004 traditional top load washers 110-60 HZ., using normal cycles, UL standard test.

## LOW WATER WASH SYSTEM WITH MICROTATOR™

These washers conserve resources by saving over 400 gallons of water\* and energy with the help of the Intelliclean™ Microtator™.

This extra small agitator moves independently of the wash basket, creating increased action for thorough cleaning. The end result is a better cleaning performance for you and your clothes.

Centennial high efficiency washer features the new Microtator™ washing system instead of a normal agitator, creating more space to easily handle large loads of clothes.
