DEDICATED TO COTTON AND SYNTHETICS.

The first complete program that washes and dries your cotton and synthetic apparel, which are two of the most frequently washed fabrics by Europeans¹. It eliminates daily dirt from your fabrics, dries them in a homogeneous way, and reduces wrinkles, while respecting colours and fabrics at the same time. Tests conducted by the independent institute INNOVHUBSSI SSO2 guarantee that a load equal³ to a normal load will show good results: 60% of the clothes washed are "Not wrinkled" or have "very few wrinkles" and that 72% of the clothes washed are "Very Easy" or "Easy" to iron.
